Material quality, supply chain resilience, and sustainability initiatives elevate semiconductor materials innovator to highest honor

Henkel earns ASE 2024 Best Supplier Award, recognized for its part in carbon verification project

Kaohsiung, Taiwan – Henkel today announced that it has received a 2024 Best Supplier Award from ASE Technology Holdings Co., Ltd. (ASE) in recognition of its important contributions to ASE's technology objectives and strategic vision. In addition to the 2024 Best Supplier Award, Henkel was given a certificate of appreciation for participating in ASE's carbon verification project, highlighting its sustainability data reporting transparency and accountability.

ASE, a leading provider of semiconductor packaging and test services, presented the awards at a ceremony in April, during which it noted that building a resilient and highly sustainable supply chain requires partners committed to technological innovation, supply chain adaptability, and ESG. As an enduring and strategic partner, Henkel shares this vision, investing in innovation to support ASE's technology roadmap and, with its fierce commitment to sustainability, positively contributing to ASE's stated Net Zero 2050 and energy reduction ambitions.

"In the dynamic semiconductor industry amid today's challenging global landscape, it is vital to have reliable partners with agility, technical depth, and aligned values," said Wen Zhou, Corporate Vice President Electronics at Henkel Adhesive Technologies, who accepted the award from ASE alongside her colleagues. "Henkel is honored to be a 2024 Best Supplier Award recipient and to have earned ASE's trust – not only for our semiconductor materials capability but also our ESG achievements and ongoing sustainability initiatives. The Henkel team is unyielding in its commitment to meet ASE's expectations. We are grateful to have been honored with such a distinction and aim to deepen collaboration with ASE to achieve even more together."

Henkel develops semiconductor packaging materials for ASE and was one of only 17 suppliers out of hundreds of global partners to meet the 2024 Best Supplier Award's stringent criteria. Furthermore, the company was among the eight elite suppliers recognized for successfully participating in ASE's carbon verification project.
